

PROBABLY THE WORLD'S MOST SUSTAINABLE MEETING PLACE

We believe that a good meeting place should not only be ready for the future – it should lead us there. We give you access to Europe's largest integrated meeting place in the world's most sustainable city. When you hold your event with us, you can rest assured that the venue meets strict international sustainability standards. You will enjoy top class experiences in a secure environment where we take social and environmental responsibility.

We have spent many years developing our meeting place in a sustainable direction. We are certified according to ISO 20121, a sustainable events standard with high international ranking.

SUSTAINABLE MEETINGS THAT MEET YOUR REQUIREMENTS:

- 100% of electricity at the meeting place comes from wind power.
- We recycle approximately 95% of our waste. Part of our food waste is converted into biogas which powers the hobs in our restaurant kitchens.
- Our restaurants aim to use organic, local, and fair trade ingredients. For instance, they only serve fair trade coffee and organic milk. The menu can be adapted for those who prefer not to eat meat.
- There are always vegetarian options available.
- We have 100,000 bees on our roof, which provide honey served at breakfast. We also grow our own herbs.
- We donate food to the Gothenburg Rescue Mission.
- We use consolidation to minimise goods transport to and from our facility. We always offer our customers carbon-offset shipment options.
- If you want to rent stand materials – and reduce your own transport – we can provide most of the equipment you need, including carpets, furniture and plants. Read more about what we offer at: monterservice.com
- Gothenburg is a sustainable destination that has topped the ICCA Global Destination Sustainability Index for four consecutive years.
- If you want to obtain an environmental diploma for your event, we can help you arrange it. The diploma is awarded according to the Swedish Environmental Base (Miljöbas) method. Read more about the environmental diploma at: svenskamiljobas.se/swedishenvironmentalbase.html

100%

100 PER CENT of the coffee served at our meeting place is ecological and Fairtrade.

55,000

EUR 55,000 was donated to Rescue Mission during the Christmas gift campaign. This sum was spent on children's counselling, soft toys for unaccompanied child refugees and porridge breakfasts at the Rescue Mission's café for the homeless.
